

**Huntington's Disease Research
Run & Walk
Sunday, August 26, 2012
Zorinsky Lake Park
(156th and "F") Omaha, NE**

The 13th Annual HD Research run and walk begins with registration between 8:00 and 8:45 am. The run begins at 9:00 am with the optional, 1, 2, 3 or 4 mile walk event starts at 9:05 am. It is a picturesque route along Zorinsky Lake Park on a hard surface trail. Markers will be posted every mile. Water and refreshments will be provided. This will be a festive event that will include music, door prizes, raffle and a bouncy castle for the kids.

**Rain or Shine
Awards to top 3 male and female 4
mile runners!**

Huntington's Disease, or HD, is a genetic neurological disorder characterized by abnormal body movements called chorea and a lack of coordination; it also affects a number of mental abilities and some aspects of behavior. In 1993, the gene causing HD was found. It was one of the first inherited genetic disorders for which an accurate test could be performed. Because of this, and the disorder having aspects applicable to other neurological disorders, such as Alzheimer's disease, it has been extensively researched since then. The gene causing the disorder is dominant and may, therefore, be inherited from a single parent. There is currently no proven cure, so symptoms are managed with a range of medications and supportive services. Your financial support will help us to continue the research to find a cure!

**T-Shirts are limited to the first 250
participants!**
