

REDUCE ENERGY THIS SUMMER WITH SUCCESS!

Energy curtailment at the Med Center helps us manage demand and stay energy efficient during the summer. Below are some ways you can help reduce energy use during curtailment days (and always!).

Shut off lights in empty areas

Unplug or turn off equipment not in use, and charge equipment after 7:00 PM

Close blinds, shades and curtains

Climb stairs over taking the elevator if able

Educate others!

Switch to revolving doors or opening doors manually (instead of ADA buttons, if possible)

Shut the fume hood sash!
