Workshop for Health Science Educators

Effective Teaching in the Clinical Setting
March 19-21, 2008
UNMC Campus

Sponsored by:
School of Allied Health Professions
University of Nebraska Medical Center

Often educators in the health sciences are experts in their subject areas, but have little knowledge of teaching methods. To provide such faculty with opportunities to improve their teaching skills, the School of Allied Health Professions at UNMC offers workshops on various aspects of education in the health sciences.

This program, Effective Teaching in the Clinical Setting, utilizes highly personalized instruction and intensive workshop sessions with an emphasis on practical applications of teaching theory and techniques. The workshop offers experience in planning lessons and demonstrations, defining objectives, preparing instructional materials, and practicing effective teaching techniques.

WORKSHOP OBJECTIVES

Upon completion of the workshop, the participant will be able to:

- Formulate objectives for your teaching that include the four key elements of an instructional objective.
- Use the six key elements in establishing an instructional set for a lesson.
- Apply selected planning considerations and presentation techniques in the presentation of a demonstration.
- Use the four key elements in achieving effective instructional closure.
- Apply four teacher tactics in the teaching/learning process.
- Demonstrate an understanding of the influence of specific verbal and non-verbal behaviors on the teaching/learning process.
- Utilize three levels of questioning and five types of probes.
- Design and utilize a performance evaluation instrument.
- Compare and contrast the due process requirements related to academic versus disciplinary actions in legal considerations of clinical education.
- Effectively identify student problem behaviors.
- Develop remediation plans to address student problem behaviors.

Registration fee for 3-day workshop, which includes all instructional materials, lunches, and breaks, is $150 for UNMC faculty and staff.
