# CHEMICAL PERSONAL PROTECTIVE EQUIPMENT

## Suit Support - Donning

PULL THE HOOD OF SUIT UP AND MAKE FINAL CHECK OF TAPE SEALS

## REMOVING SUIT SUPPORT PPE

- Begin by cleaning any areas of the suit that may have been chemically contaminated if necessary.
- Carefully remove all tape from gloves and boots and unzip suit.
- Remove outer gloves being careful not to contaminate inner gloves.
- Remove suit only touching inner surfaces. Try to keep outer surfaces turned in on themselves.
- Step into a clean (cold zone) area.
- Once suit is removed, inner gloves can be removed and hands sanitized if desired.
- Remove respiratory protection last, then proceed to hand washing and shower.

NOTE: If any areas of your body were contaminated during the doffing process, decontaminate them well in the shower and **notify the decon leader or appropriate personnel.**
