\*Travel and lodging costs may apply.

We also welcome your suggestions for Hospital Decontamination PPE educational modules that would help your organization in its preparedness efforts.

# HOSPITAL DECONTAMINATION PPE

Produced in collaboration with Omaha area hospital decontamination teams, these Just-in-Time training modules have been developed to demonstrate the correct Donning and Doffing of Personal Protective Equipment (PPE) for both Level-B and Level-C chemical protective equipment.

The videos cover donning and doffing separately and give step-by-step directions with demonstration. Additional PAPR assembly and use videos are also available.

Current Hospital Decontamination PPE modules can be found on the HEROES website. Scan the QR code below to keep up to date with future educational content through our social media channels.
